EXPERIENCE

2021 -

Software developer | Pragma S.A

Currently

- in the beginning, I internally participated develop in the internal project of pragma called bitacora, realized with **Angular** and with a basis in **methodologies of agile development scrum**, always focused on a **continuous environment of integration**.
- Currently, my internal client is a **bank** in the Dominican Republic called **BHD** where I am the **frontend technical leader of commercial team**, where I work under the **SOLID** guidelines in two technologies: **Ionic-Angular** and **Angular-Pega**. I am in charge of taking to production the requirements of the commercial cell. We work under **scrum methodology and in a continuous integration environment**.
- Within the general frontend team, I contributed to Teseo, a monorepo Angular-Pega project designed to replace the previous Angular-Pega project. Teseo was built using the latest version of Angular and micro-frontends, employing a clean architecture approach.

2021

Software Engineer| World pos
solutions S.A

- I developed an Android library to be able to connect and use mpos devices through bluetooth on smartphones.

EDUCACIÓN

2014- 2021

Universidad de pamplona

Ingeniería de sistemas

2012 - 2013

Sena

Técnico en sistemas
